EdTech Startups Lookbook

Ukrainian Tech Ecosystem

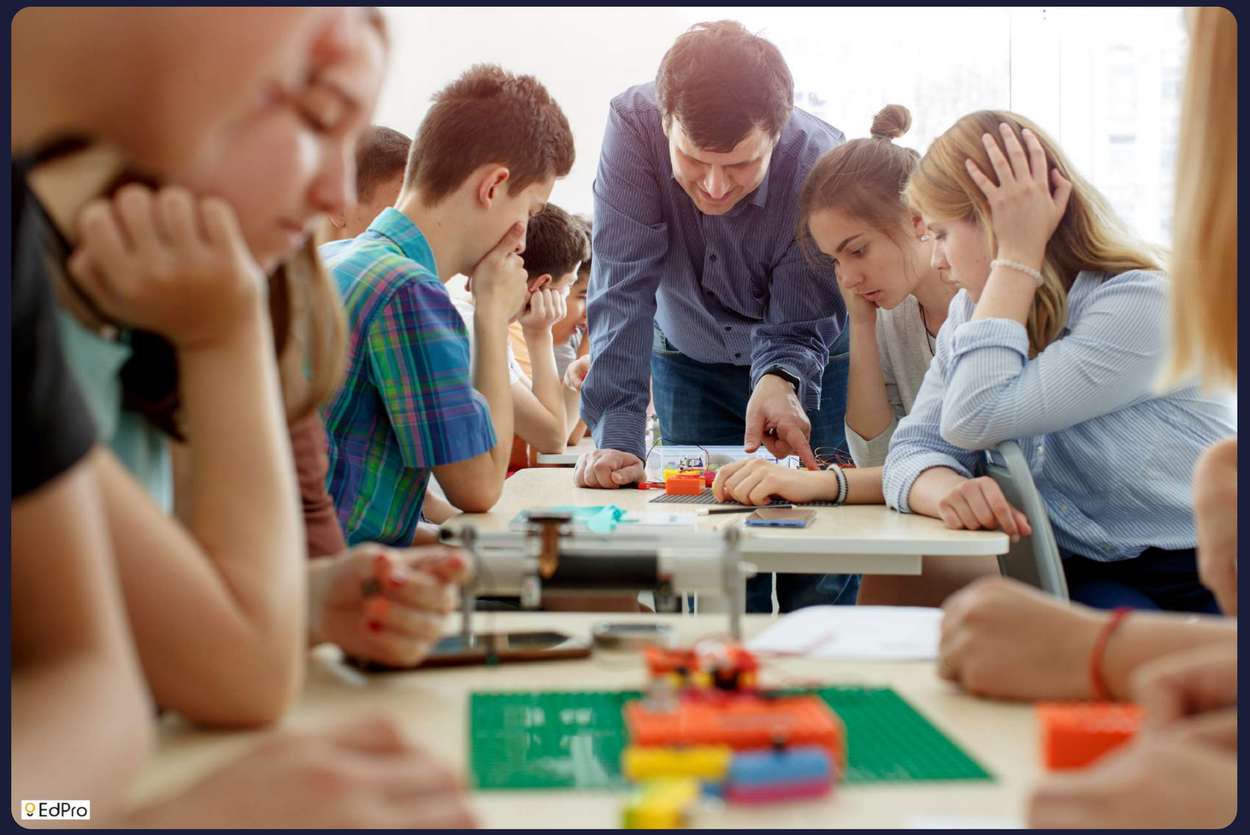

AMPERIA

Company goal/mission

Our goal is to spark the interest of modern children in studying physics, encouraging them to experiment and explore the processes happening around us.

Product/service description

Amperia is a unique laboratory equipment that, on one hand, is highly engaging for children, and on the other hand, it enables a thorough and professional exploration of topics related to electricity and magnetism in schools.

Ukrainian Tech Ecosystem

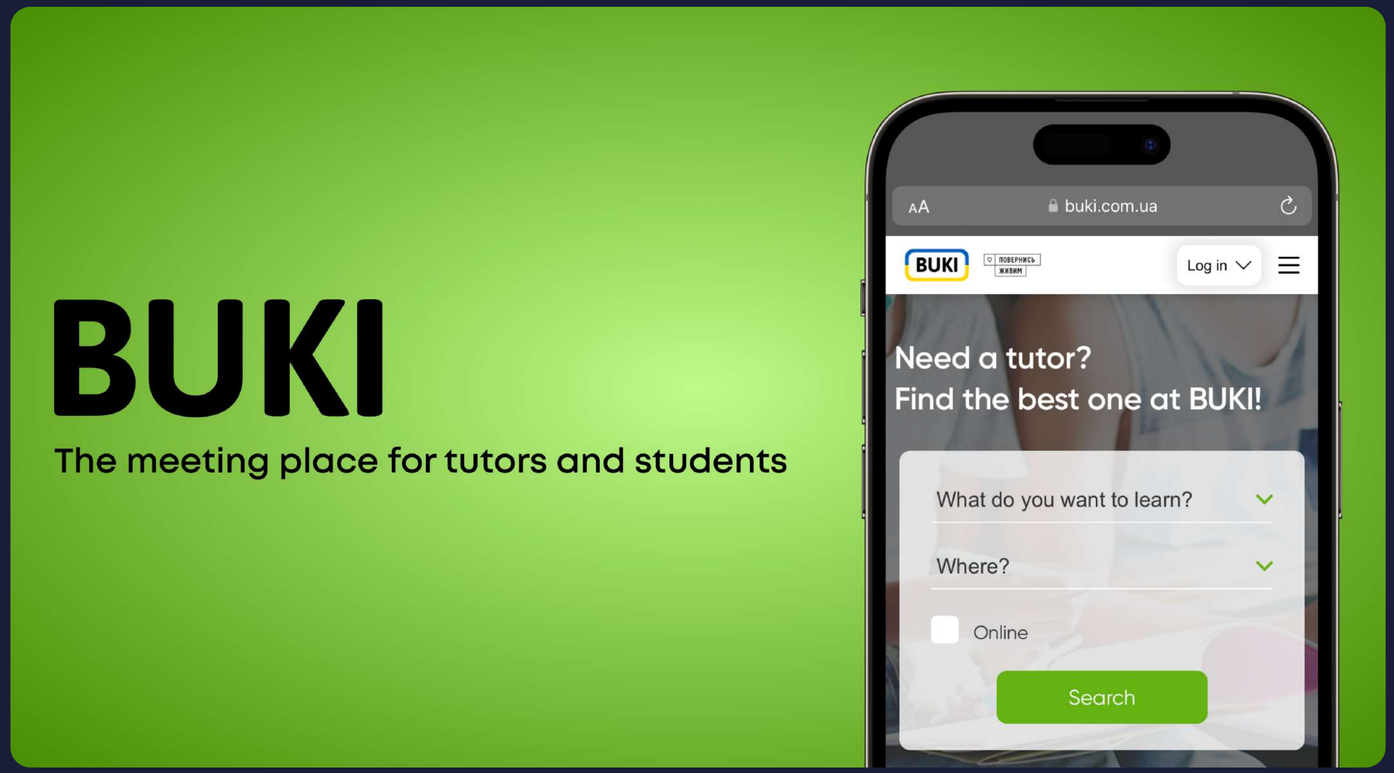

BUKI

Company goal/mission

International EdTech company that helps tutors around the world find students and clients find the best teacher.

Product/service description

Marketplace for finding tutors and students.

Ukrainian Tech Ecosystem

Company goal/mission

To bridge the gap between talent and the job market.

Product/service description

Social media and EdTech for creative industries.

Ukrainian Tech Ecosystem

elai.

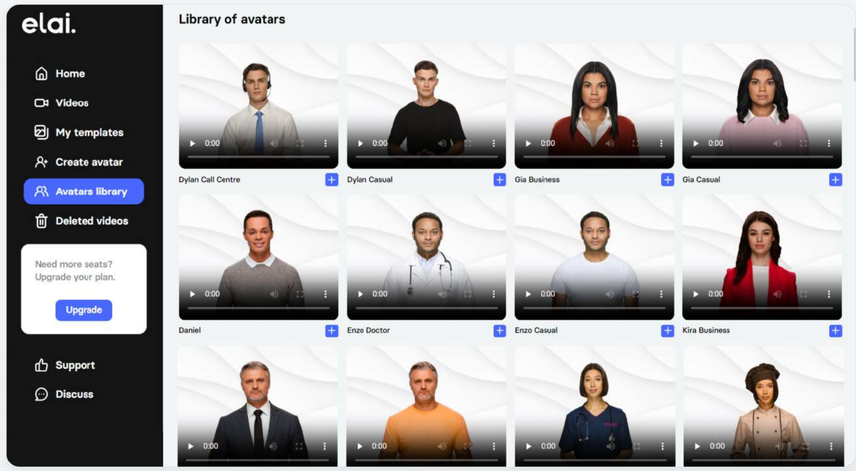

Company goal/mission

Elai’s mission is to provide a new way of video creation for education using AI.

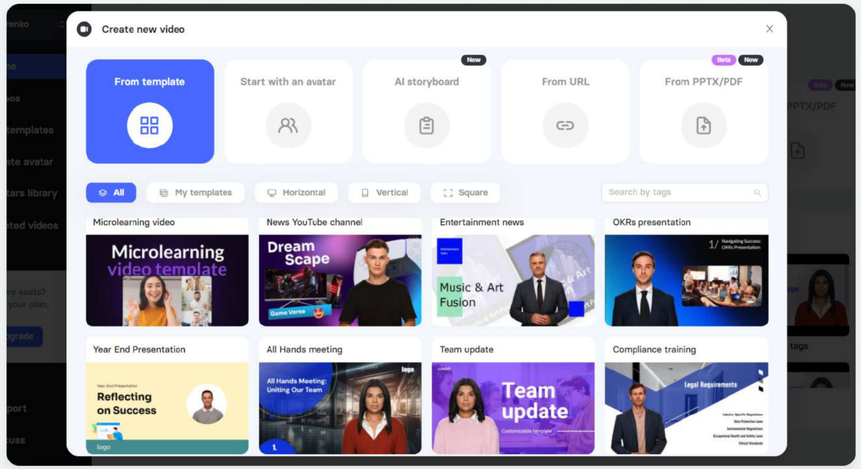

Product/service description

Elai is an AI-powered platform that allows you generate studio-quality educational and L&D videos with digital human narrators just from text, presentation or topic.

Choose any presenter from 80+ available and use it in your videos, or create your own avatar.

Elai editor comes with a wide variety of professional video templates in different categories.

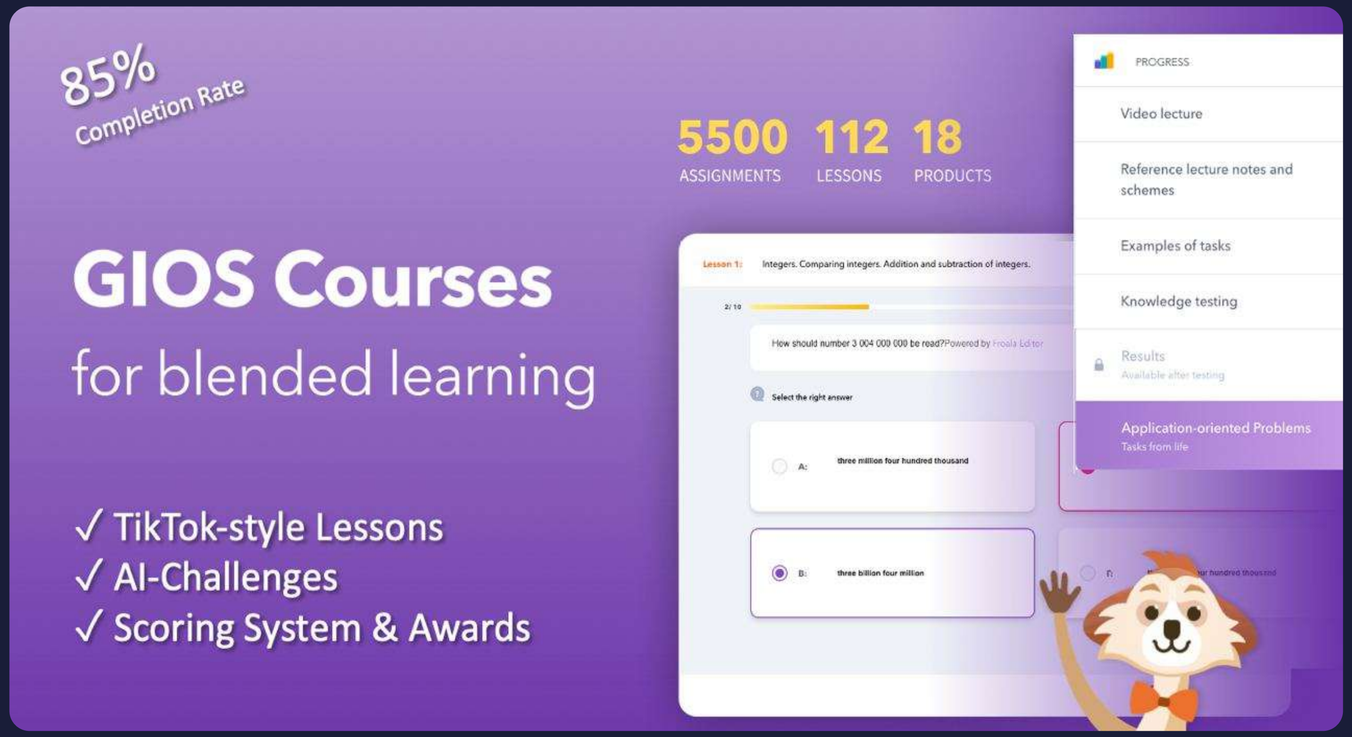

Ukrainian Tech Ecosystem

Company goal/mission

To provide an accessible and engaging AI-driven Math platform that empowers millions of students worldwide to learn with joy.

Product/service description

An interactive AI-driven TikTok-style Math platform and tutoring marketplace for K12 students and teachers.

Ukrainian Tech Ecosystem

Headway

Company goal/mission

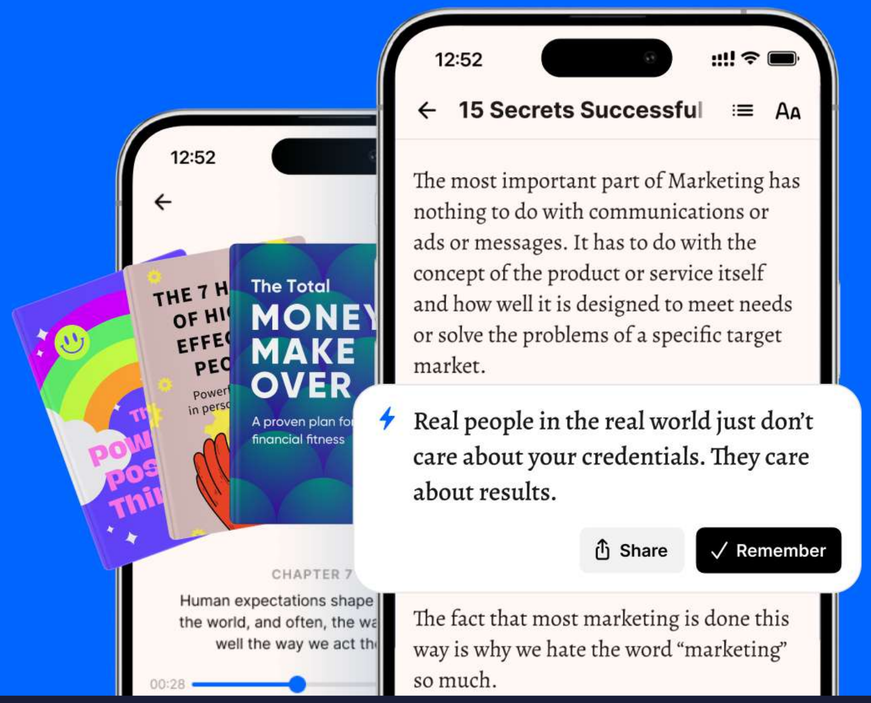

Headway's startup mission is to help people grow by making the best ideas accessible and crafting enjoyable products.

Product/service description

We create microlearning products, helping 80M+ private and corporate users worldwide achieve their goals. Recognized by GSV 150, a list of the world's most transformative digital learning and workforce skills companies by Global Silicon Valley.

Headway

Our flagship product, the Headway app, summarizes nonfiction bestsellers. The app helps boost self-development by grasping the book's key ideas in less than 15 minutes.

Ukrainian Tech Ecosystem

Company goal/mission

Nanit Robot is an Edtech solution for children and adults that aims to develop creativity and engineering skills that increase professional orientation by 3 times.

Product/service description

The Nanit Robot is an educational STEM solution designed for children aged 5 to 11. It includes 30 different robots that can be built from a single box, along with educational cartoons. These resources provide a playful and engaging way for children to learn robotics and electronics at home.

Ukrainian Tech Ecosystem

sensorama

Company goal/mission

Sensorama's mission is to develop innovative XR products for education, focused on providing a safe, engaging, and efficient way for individuals to learn and improve skills, preparing them for professional success.

Product/service description

Sensorama provides educational products and solutions using AR\VR technologies. We developed Sensorama VR training as a product aimed at newskilling, upskilling and reskilling of professionals. So far, this product has been used for training employees and students in oil and gas, manufacturing, healthcare, logistics, food technology, energy and other spheres.
